

Visual Ballot Review

A voter may ask for a visual review of their ballot on the scanner LCD screen *before placing the ballot into the scanner*. You will then:

- Use the i-button to activate the menu on the LCD screen
- Press 'Ballot Review'
- Press 'Visual'

Inform the voter (if necessary) on how to read the review on the screen:

- The voter will press 'more' to advance from the first screen, 'prev' or 'next' on the following screens
- Following the review, the voter will press Cast or Return to process the ballot

Leave the voter alone at the scanner to provide privacy

The voter may then insert the ballot & read the review
